

noxi
nano

NANO MIST

A multi-purpose atomizer with a specially designed cartridge container allows you to spray the skin with well selected cosmetic products in the form of nanoparticles capable of penetrating deeper layers of your skin. Just replace your cartridge to enjoy exactly the moisturizing and nourishing effect your body needs right now.

The advanced nano-spray technology, enables Noxi Nano the immediate transport of nanoparticles and their penetration into deeper layers of the skin.

ICE

Like a touch of ice, it provides refreshment for tired skin. Based on the crystal-clear water from the Icelandic glacier Ölfus spring makes the face look fresh and radiant even after yesterday's celebrations.

It is perfect for travelling, especially when you suffer from jetlag. It restores the energy and radiance of sleep-deprived skin.

GLACIER WATER

Water sourced from the legendary Ölfus spring in Iceland, one of the world's most virgin ecosystems. The crystal clear water, owing to its origin, is practically free of impurities and nitrates. Recommended for sensitive skin prone to irritation.

ICEAWAKE™

Prevents aging of skin deprived of sleep

The active ingredient is based on an extract of *Iodobacter* spp., which has been isolated from the soil under a Swiss glacier. IceAwake™ rejuvenates skin with ageing appearance due to an intense lifestyle characterized by too little sleep. Sleep deprivation not only leads to tired appearance in a short period of time, but is also a factor for long-term skin aging.

In clinical trials in Asian and Caucasian women and men, IceAwake™ visibly rejuvenated their appearance by reducing the depth of wrinkles, increasing glow and reducing fatigue.

IceAwake™

- stimulates tired skin
- reduces wrinkles already in two weeks
- increases the radiance of the skin despite an intense lifestyle

Before

After 14 days

ICEAWAKE™

Prevents aging of skin deprived of sleep

After 14 days of treatment 2% IceAwake™ significantly reduced the depth of wrinkles by 15.9% compared to the initial conditions. In addition, the use of 2% IceAwake™ increased skin radiance by 9.2% and significantly reduced visible fatigue in 71% of volunteers, according to the clinical evaluation trial.

LANABLUE™

Smooths the skin
and reduces wrinkles

Lanablue™ is an extract of blue-green algae that acts as a natural retinoid, smoothing the skin without undesirable side effects. It has an anti-wrinkle effect, providing a smoothing effect and regenerating the skin.

LANABLUE™

- offers excellent composition: vitamins, amino acids and trace elements
- smooths and regenerates the skin without side effects
- significant reduction of wrinkles after just 21 days

NORDIC COTTON

Restore the glow of sensitive and
and reactive skin

NORDIC COTTON is extracted from the flowers and stems of *Eriophorum spissum* called the Nordic cotton. To survive in extreme conditions, this plant synthesizes active ingredients such as sugars, polyphenols and minerals that protect it and increase its resistance to external factors.

The skin needs a real cosmetic shield so that it does not dry out and does not feel irritated. Nordic Cotton strengthens the skin's natural barrier, moisturizes and soothes it. Its soothing properties enable it to provide you with a feeling of softness and makes skin delicate as silk when touched.

NORDIC COTTON

- hydrates
- detoxifies
- calms

TREHALOSE

Trehalose is one of the most effective moisturizing ingredients. The substance mimics the composition of NMF, a natural moisturising agent found in the epidermis. Trehalose not only moisturizes, but also strengthens the natural functions of the protective barrier of the epidermis. It improves skin condition, soothes irritations and smoothes fine wrinkles.

Ingredients available in
the **touch serum**

HYALURONIC ACID

Hyaluronic acid is one of the most popular active substances. It is the basic superstructure of the dermis. It fills its intercellular spaces, allowing the exchange of many ions, nutrients and metabolic products. It is a highly hydrophilic substance, which means that it has the ability to bind water in an amount exceeding 1000 times the weight of one molecule of acid.

HYALURONIC ACID

- prevents water loss and moisturizes the epidermis
- protects and enhances the hydrolipid barrier
- increases the absorption of ingredients
- prevents aging and wrinkles

BALANCE

We live in times that are putting ever new challenges in front of us. An intense lifestyle keeps us constantly on the move and requires multitasking. Work, home, children, the pursuit of a better life - these are only a few examples of activities that we try to combine in our everyday life. They lead to physical and mental fatigue, which also significantly affects the condition of our skin.

BALANCE restores skin balance. The combination of active ingredients calms it down and relaxes, also reducing redness. Thanks to the composition of extracts, it stimulates regeneration and has a soothing effect. In addition, it intensively moisturizes, improves the overall appearance of the skin and gives it a feeling of softness, making it silky to the touch.

AGASCALM™

Reduces inflammation and redness of skin induced by stress

Agascal™ is a natural active ingredient derived from the plant *Agastache mexicana*, native to South America and Mexico. Agascal™, thanks to its acetylene and tilianin content, is able to counteract the skin effects of psychological stress.

AGASCALM™

- reduces inflammation of the skin and redness caused by psychological stress
- improves the elasticity of blood vessels
- restores the function of the protective barrier and improves skin hydration
- enhances skin radiance and evens out skin tone

Before

After 28 days

Difference between Placebo and AgascalM™ after 28 days

The images prove that after 28 days of application of AgascalM™, the radiance of the skin has increased and it also improved and unified its overall appearance.

SENSERYN™

It calms down the skin through the senses

A sensocosmetic that interacts with sensory receptors in the skin. SENSERYN™ strengthens the skin's protective barrier by activating its bitter taste receptors. It was created to take advantage of hops in mitigation and protection against unfavourable conditions.

SENSERYN™

- makes a reactive skin more resistant to inflammation
- optimizes its anti-inflammatory microbiome
- neutralizes the burning sensation
- reduces itching
- prevents and reduces redness
- restores skin comfort and softness

SENSERYN™

It calms down the skin through the senses

Skin redness is the visible effect of excessive vasodilation caused by inflammation. In just 28 days SENSERYN™ reduces the number and total area of redness by 11.6% and 12.6%, respectively.

The research group consisted of 32 white volunteers (males and females), aged 18 to 60, with atopic-prone skin.

AZELOGLYCINE

Azeloglycine is the contemporary alternative of azelanic acid. It retains all its properties, while perfectly moisturizing and improving skin condition. It brightens sun, and post-inflammatory discolourations and increases both the hydration level and its elasticity. Normalizes sebum secretion, has antibacterial properties and unlocks pores. At the same time, unlike the stronger acids, it does not irritate the skin. It gives the skin a healthy radiant glow.

AZELOGLYCINE

- brightens dark spots
- normalizes sebum secretion and acts as an antibacterial agent
- does not irritate the skin

Whitesense™ is a plant-based cosmetic formulated to provide a skin experience.

This experience affects the mood of the users, securing their well-being.

Whitesense™ offers the impression of softness and velvety touch of white flower petals: rose, jasmine and daisy.

WHITESENSE™

- gives the skin a feeling of smoothness, softness and silkiness
- improves hydration
- eliminates roughness of the epidermis

WHITESENSE™

Provides impressions to ensure
well-being

GREEN TEA

Green tea is a rich source of polyphenols, vitamins A, C, E, K and B and mineral salts, including salts of: iron, calcium, manganese, potassium, fluorine, silicon. This extract normalizes sebaceous glands, inhibits the development of inflammation and regenerates the skin.

GREEN TEA

- antioxidant action
- inhibits ageing processes
- has anti-inflammatory properties
- cleanses, refreshes and tones
- soothes irritation

GOTU KOLA

Asiatic pennywort, also called gotu kola, exhibits anti-inflammatory, antibacterial and skin regeneration processes stimulating properties. It stimulates fibroblasts to produce collagen and elastin fibres. In addition, it strengthens blood vessels and reduces swelling.

ASIATIC PENNYWORT

- stimulates the production of collagen and the synthesis of hyaluronic acid
- tones the skin
- smoothes and moisturizes the skin
- demonstrates anti-inflammatory and antiseptic activity
- inhibits the formation of wrinkles and acts as a strong antioxidant

TREHALOSE

Trehalose is one of the most effective moisturizing ingredients. The substance mimics the composition of NMF, a natural moisturising agent found in the epidermis. Trehalose not only moisturizes, but also strengthens the natural functions of the protective barrier of the epidermis. It improves skin condition, soothes irritations and smoothes fine wrinkles.

It fills its intercellular spaces, allowing the exchange of many ions, nutrients and metabolic products. It is a highly hydrophilic substance, which means that it has the ability to bind water in an amount exceeding 1000 times the weight of one molecule of acid.

HYALURONIC ACID

- prevents water loss and moisturizes the epidermis
- protects and enhances the hydrolipid barrier
- increases the absorption of ingredients
- prevents aging and wrinkles

ENDORPHIN

It delivers a huge dose of „endorphins” to greyish and tired skin. It helps to bring out its radiant glow, restores elasticity and reduces wrinkles. Polynesian lagoon water refreshes and revitalizes the skin, making it full of energy.

HAPPY SKIN

Provides your skin with a sense of well-being and relaxation

Happy Skin is a plant ingredient that supports the production of β -endorphins in the skin. Thanks to the stimulation of neuropeptide production and antioxidant properties, HAPPY SKIN™ affects internal relaxation, relaxes and reduces stress, which finds its reflection in the external appearance of the skin.

HAPPY SKIN

- a neurotransmitter-releasing ingredient that gives a feeling of pleasure, well-being and relaxation
- has an anti-stress effect
- protects against harmful action of free radicals

WATER FROM A POLYNESIAN LAGOON

Intense skin hydration

It contains mainly minerals and trace elements such as calcium, potassium, magnesium and sulphur. As a result, it has remineralizing, revitalizing, refreshing, and cleansing properties and it reduces bloodshot appearance of skin.

It turns matt and grayish skin into radiant and illuminated one.

Ingredient available in
the **touch serum**

GREEN CAVIAR

Perfectly counteracts aging of the
skin

The umibudo seaweed is commonly referred to as the green caviar. It has an exceptionally high nutrient content. It is a perfect source of proteins, vitamins and elements such as iodine, potassium, calcium or magnesium. It also contains chlorophyll and hyaluronic acid.

GREEN CAVIAR

- strongly moisturizes and rejuvenates the skin, reducing the appearance of wrinkles
- accelerates cell renewal and regeneration
- restores elasticity and evens the tone of the skin

KOMBUCHA EXTRACT

This fermented beverage is made from sweetened tea and a tea biofilm, also called symbiotic culture of bacteria and yeast or short - SCOBY. Rich in vitamins B, C, and nutrients it also has found many applications not only in the kitchen, but also in cosmetics.

KOMBUCHA

- brightens and smoothes the complexion
- inhibits the formation of discolourations
- improves the skin tone
- restores the correct pH

VITAMIN C

Widely recognized as one of the „vitamins of youth“. As a powerful antioxidant to prevent premature skin aging. It participates in the synthesis of collagen – strengthens and firms the epidermis, brightens the skin tone and inhibits the overproduction of melanin, which effectively prevents the formation of discoloration.

Ingredients available in
the **touch serum**

TREHALOSE

Trehalose is one of the most effective moisturizing ingredients. The substance mimics the composition of NMF, a natural moisturising agent found in the epidermis. Trehalose not only moisturizes, but also strengthens the natural functions of the protective barrier of the epidermis. It improves skin condition, soothes irritations and smoothes fine wrinkles.

DREAM

A wonderful cocktail of active ingredients soothing the senses. It relaxes the skin, provides an experience that ensures excellent well-being every day, while creating a protective barrier against harmful blue light emissions from mobile phones, tablets and laptops. The essence of dreams activating longevity genes™, perfectly counteracts skin aging and the formation of wrinkles.

SYNCHROLIFE™

Reduces visible signs of skin fatigue

The peptide-based active ingredient synchrolife™ aligns circadian rhythms, restores balance in case of stress-related problems that generate signs of fatigue and premature skin ageing.

Counteracts the harmful effects of blue light emitted from our phones and laptops.

SYNCHROLIFE™

- helps maintain regular skin rhythm
- helps to protect against the harmful effects of blue light
- smoothes the skin and reduces fine wrinkles
- moisturizes and makes the skin more radiant

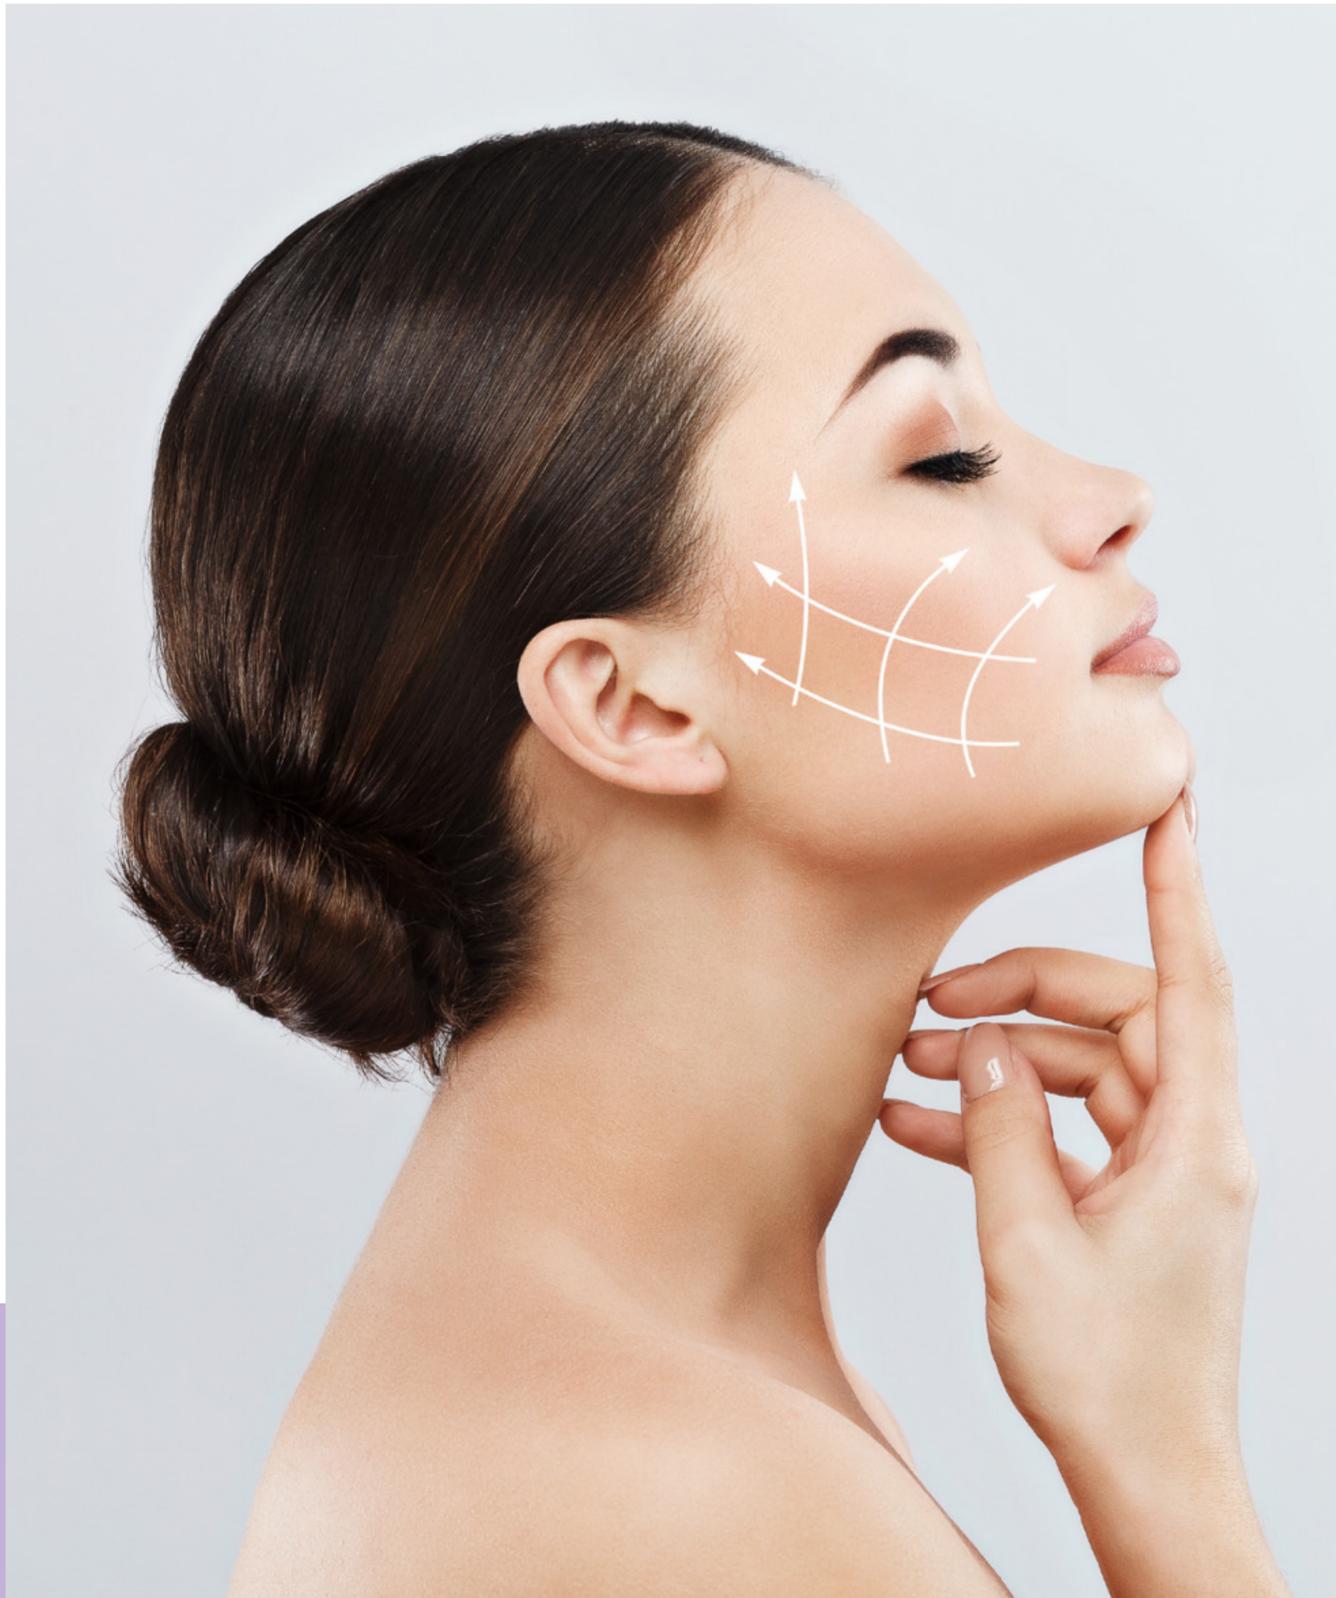

Ingredient available in
the **touch serum**

MATRIXYL® **MORPHOMICS™**

Enables activation of
longevity genes™

Matrixyl® Morphomics™ is a peptide that reduces deep wrinkles on the forehead, particularly the vertical ones, which give our faces a sad expression. In addition, it stimulates the production of collagen fibers, which are the scaffolding of skin and reduces crow's feet. It makes the skin more resistant to all kinds of deformations due to repeated facial expressions.

MATRIXYL® MORPHOMICS™

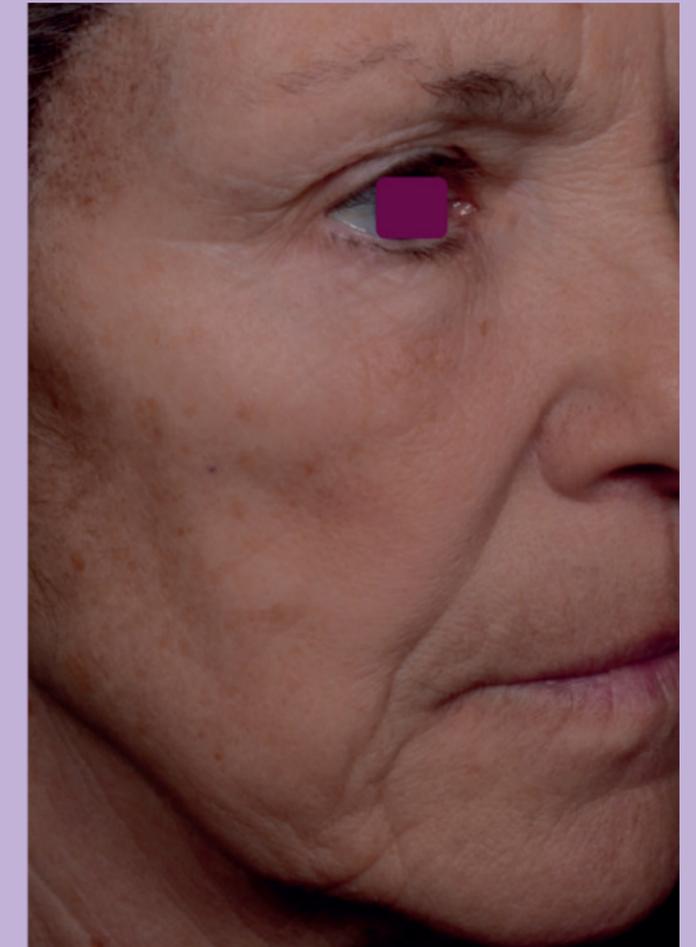

Enables activation of
longevity genes™

MATRIXYL® Morphomics™ helps to reduce vertical lines (wrinkles, puppet lines, nasolabial folds) as well as crow's feet after just 6 weeks, which allows for a more joyful expression of the face.

the **touch serum**

Before

After 6 weeks

WAKAME EXTRACT

Supports skin regeneration

The wakame algae extract reduces swelling and brightens darker spots. It contains fucoxanthin, which is a factor supporting the regeneration and reconstruction of collagen, additionally inhibiting the ageing processes of the skin.

Owing to its content of polysaccharides, proteins, vitamins, antioxidants and minerals, it also helps to maintain the healthy appearance of the skin. WAKAME EXTRACT maintains skin firmness, elasticity and smoothness.

Whitesense™ is a plant-based cosmetic formulated to provide a skin experience.

This experience affects the mood of the users, securing their well-being.

Whitesense™ offers the impression of softness and velvety touch of white flower petals: rose, jasmine and daisy.
